

CARE & MAINTENANCE INSTRUCTIONS

CARE & MAINTENANCE

CERAMICS, BATH, TAPWARE & FURNITURE

CARE OF CERAMICS

With daily care, your Villeroy & Boch and Argent ceramics will shine for many years to come. For the daily cleaning of your ceramics, we recommend using a soft, non-abrasive sponge or cloth. If you wish to use a cleaning agent, it is best to use a standard, general-purpose cleaning agent.

You can use all standard cleaning agents. Villeroy & Boch ceramics are resistant to all acids and alkalis typically used in the home (as well as cosmetic and medical products containing solvents, alcohol and acetone).

Please do not use any aggressive cleaning agents that are harmful to the environment. All ceramic surfaces will be damaged by the regular use of scouring creams and powders, highly concentrated drain cleaning chemicals, special tap/metal cleaning agents or bleaching agents containing chlorine.

Microfibre cloths are suitable for Villeroy & Boch and Argent ceramics. Tip: Dampen microfibre cloths before use. For stubborn stains or marks, use Chemico and a microfibre cloth.

CARE OF TOILET SEATS

With regular care, your toilet seat will stay clean for many years to come. We recommend using a soft, non-abrasive sponge or cloth with a gentle detergent such as washing-up liquid. Remove the hinge cap covers and clean underneath and around the hinge posts to ensure urine does not build up on the hinges. Dry all surfaces as soon as possible.

CARE OF BATHS

Acrylic and Quaryl® surfaces are extremely easy to clean as they are pore-free and seamlessly smooth. For the surfaces to retain their brilliance, all that is needed is regular treatment with a sponge and a liquid cleaning agent that is also suitable for synthetics, such as acrylic.

Alkaline cleaning agents, such as standard washing-up liquid, can be used to remove substances that leave greasy marks.

CARE OF FURNITURE

To keep your furniture looking like new and to prevent scratching or damage, we recommend cleaning with a warm, damp, soft cloth, then dry off to always maintain a quality finish. Harsh chemical or abrasive cleaners are not recommended as they will dull the finish. Moisture should be removed/dried from the furniture as soon as possible.

CARE OF TAPWARE

Villeroy & Boch, Argent and Fima tapware all feature a high quality finish. To keep them looking like new and to prevent scratching or damage, we recommend cleaning with a warm damp soft cloth, then dry off to always maintain a shiny finish. Harsh chemical or abrasive cleaners are not recommended as they will dull the finish.

CARE OF FLUSH PLATES AND ACCESSORIES

Our flush plates and accessories all feature a high quality finish. To keep them looking like new and to prevent scratching or damage, we recommend cleaning with a warm damp soft cloth, then dry off to always maintain a shiny finish. Harsh chemical or abrasive cleaners are not recommended as they will dull the finish.
